To the Head of Customer Service of "Center of Information Technologies" Nelian "

### Supply Agreement: No. 12/09/24

The above named company's CEO Stephen Kwasi Oduro has been using Biolaz-Oberon model 21MI with Metapathia software and Dianel 22s-iON (Plenus Edition) complex since January 2011 and November 2013 respectively.

Our organization is engaged in diagnostics and wellness therapies and is working mostly traditional medicine, alternative medicine, naturopathy, selection of nutritional supplements, bioresonance testing, spiritual healing and holistic wellness coaching. The CEO has been working for more then 15 years with Sente Bibu General Medical Practitioner in Amsterdam as general health information advisor. The main activities of Bak4 Diagnostics are bioresonance and wellness coaching

During operation of complex Dianel 22S-iON since November 2012 up to May 2013, I have made tests of more than 75 individuals but unfortunately for me, during my last update, I forgot to make a back up and as a result deleted my data up to 15 March 2013. I have currently 32 clients in my database.

The specify approximate percentage of matching diagnoses performed with Dianel-22S-iON COMPLEX, as compared to clinical diagnoses is not available but about 90% of individuals diagnosed agreed with the outcome and appreciate the accuracy of the device. Those who discussed the outcome with their Doctors were given further examinations with satisfaction.

The benefits of working with Complex Dianel for me is that it takes lesser time from start to end. It is very user-friendly and a wonderfuor me is that it take a shyou see.l teaching device for client/patient to help appreciate their bodies and therefore follow the given advice after the diagnose. It helps build a better practitioner-client working relationship and self confidence. This has help in creating the awareness through public lectures and further include recreational activities our wellness business.

There are no specific deficiencies identified so far in the complex or the software except that some words were in Russian language but this has been taken care of in the last update

At the moment, I do no have any specific comments or suggestions to help improve the operation of the device and software.

I will appreciate it very much if the products of Agel could be tested and included in the SUPPLEMENTS database.

Amsterdam, 26 April 2013

X

---

Barima Asamoah Kofi IV (Stephen Kwasi Oduro)
